MATERIALS SCIENCE & ENGINEERING A

Subject Index of Volume 202

Acicular goethite particles
geometrical characterization of acicular goethite particles in systematically controlled processing 201
Aluminum alloy
Al–TiC particulate composite produced by a liquid state in situ process 172
Applied stress
creep behaviour of a Ni–15Cr solid solution alloy at low stresses and intermediate temperatures 11

Borides
crystallographic analysis of borides in Ni_3Al base alloy IC6 193

Carbides
investigation of thermal and hydrogen effects on emissivity of refractory metals and carbides 134
Carbon–boron tool steels
mechanical properties of two ultrahigh carbon–boron tool steels 94
Cemented carbide
chemical vapour deposition of titanium carbide on WC–Co cemented carbides 238
Ceramic powders
review: aqueous tape casting of ceramic powders 206
Chemical vapour deposition
chemical vapour deposition of titanium carbide on WC–Co cemented carbides 238
Chromia scales
the effect of reactive element additions on the selective oxidation, growth and adhesion of chromia scales 1
Coatings
hadfield steel coatings on low carbon steel by laser cladding 142
Combustion
synthesis of $MoSi_2$–xNb and $MoSi_2$–$y$$ZrO_2$ composites by the field-activated combustion method 256
Composites
synthesis of $MoSi_2$–xNb and $MoSi_2$–$y$$ZrO_2$ composites by the field-activated combustion method 256
Creep
creep behaviour of a Ni–15Cr solid solution alloy at low stresses and intermediate temperatures 11
the effect of creep and oxidation on high-temperature fatigue crack propagation in ⟨001⟩-loaded CMSX-2 superalloy single crystals 76
Crystallographic analysis
crystallographic analysis of borides in Ni_3Al base alloy IC6 193

Damage mechanics
damage mechanics approach for predicting high-temperature crack growth under mixed-mode loading conditions 36
Deformation
deformation behavior and failure mechanisms in particulate reinforced 6061 Al metal-matrix composites 63
relationship between mechanism of deformation and development of dynamic recrystallization in FeAl intermetallic 128
shear deformation of high solid fraction (>0.60) semi-solid Sn–Pb under various structures 112
Densification
the effect of nitrogen alloying on the densification process of a sialon ceramic–matrix composite containing stainless steel 218
Doublet mechanics
ultimate criteria for materials with different properties in biaxial tension and compression: a micromechanical approach 84
Dynamic recrystallization
relationship between mechanism of deformation and development of dynamic recrystallization in FeAl intermetallic 128

Elastic interaction stresses
modelling of elastic interaction stresses in two-phase materials by FEM 103
Electric field
synthesis of $MoSi_2$–xNb and $MoSi_2$–$y$$ZrO_2$ composites by the field-activated combustion method 256
Electrical properties
surface deformation and electrical properties of HfN thin films deposited by reactive sputtering 226
Emissivity
investigation of thermal and hydrogen effects on emissivity of refractory metals and carbides 134

Failure criteria
ultimate criteria for materials with different properties in biaxial tension and compression: a micromechanical approach 84
Failure mechanisms
deformation behavior and failure mechanisms in particulate reinforced 6061 Al metal-matrix composites 63
Fatigue crack propagation
the effect of creep and oxidation on high-temperature fatigue crack propagation in ⟨001⟩-loaded CMSX-2 superalloy single crystals 76
FeAl intermetallic
relationship between mechanism of deformation and development of dynamic recrystallization in FeAl intermetallic 128
Fe_3Al/Al_2O_3 composites
a novel way to make Fe_3Al/Al_2O_3 composite 123
Finite element method
modelling of elastic interaction stresses in two-phase materials by FEM 103

Geometrical characterization
geometrical characterization of acicular goethite particles in systematically controlled processing 201
Grain boundary sliding
characterization of a commercial superplastic stainless steel, SuperDux64 43

Elsevier Science S.A.

Hadfield steels
hadfield steel coatings on low carbon steel by laser cladding 142
Harper–Dorn creep
role of Peierls stress in power law dislocation creep 52
Heat affected zone microfissuring
the effect of initial microstructure on heat-affected zone microfissuring in Incoloy 903 179
HfN thin films
surface deformation and electrical properties of HfN thin films deposited by reactive sputtering 226
High temperature crack growth
damage mechanics approach for predicting high-temperature crack growth under mixed-mode loading conditions 36
Hot pack rolling
microstructural evolution during rolling of Ti–22Al–23Nb sheet 26
Hydrogen
investigation of thermal and hydrogen effects on emissivity of refractory metals and carbides 134

Incoloy 903
the effect of initial microstructure on heat-affected zone microfissuring in Incoloy 903 179

Laser cladding
hadfield steel coatings on low carbon steel by laser cladding 142
Low carbon steels
hadfield steel coatings on low carbon steel by laser cladding 142

Mechanical properties
mechanical properties of two ultrahigh carbon–boron tool steels 94
Metal-matrix composites
deformation behavior and failure mechanisms in particulate reinforced 6061 Al metal-matrix composites 63
use of photoelasticity to study the effect of particle distribution on stress in composites 57
Micromechanical approach
ultimate criteria for materials with different properties in biaxial tension and compression: a micromechanical approach 84
Microstructure
Al–TiC particulate composite produced by a liquid state in situ process 172
microstructural evolution during rolling of Ti–22Al–23Nb sheet 26
the effect of initial microstructure on heat-affected zone microfissuring in Incoloy 903 179
Microstructure evolution
evolution of a metastable FCC solid solution during sputter deposition of Ti–Al–B alloys 188
Miniaturized disk-bend test
quantitative measurements of Young's modulus using the miniaturized disk-bend test 18
Mixed-mode loading
damage mechanics approach for predicting high-temperature crack growth under mixed-mode loading conditions 36
Morphology
modelling of elastic interaction stresses in two-phase materials by FEM 103
$MoSi_2$
synthesis of $MoSi_2$–xNb and $MoSi_2$–$y ZrO_2$ composites by the field-activated combustion method 256

Ni_3Al base alloy
crystallographic analysis of borides in Ni_3Al base alloy IC6 193
Nitrogen alloying
the effect of nitrogen alloying on the densification process of a sialon ceramic–matrix composite containing stainless steel 218

Oxidation
the effect of creep and oxidation on high-temperature fatigue crack propagation in ⟨001⟩-loaded CMSX-2 superalloy single crystals 76

Peierls stress
role of Peierls stress in power law dislocation creep 52
Photoelasticity
use of photoelasticity to study the effect of particle distribution on stress in composites 57
Plane stress
ultimate criteria for materials with different properties in biaxial tension and compression: a micromechanical approach 84
Platy grain morphology
texture development in platy materials: comparison of Bi2223 aggregates with phyllosilicate fabrics 157
Powder metallurgy
mechanical properties of two ultrahigh carbon–boron tool steels 94
Power law creep
role of Peierls stress in power law dislocation creep 52
Processing
geometrical characterization of acicular goethite particles in systematically controlled processing 201

Reactive element effect
the effect of reactive element additions on the selective oxidation, growth and adhesion of chromia scales 1
Reactive sputtering
surface deformation and electrical properties of HfN thin films deposited by reactive sputtering 226
Refractory metals
investigation of thermal and hydrogen effects on emissivity of refractory metals and carbides 134

Semi-solid alloys
shear deformation of high solid fraction (>0.60) semi-solid Sn–Pb under various structures 112
Shape memory alloys
cyclic stress–strain characteristics of Ti–Ni and Ti–Ni–Cu shape memory alloys 148
Sialon ceramic matrix composite
the effect of nitrogen alloying on the densification process of a sialon ceramic–matrix composite containing stainless steel 218
Slurries
review: aqueous tape casting of ceramic powders 206
Solid solution alloys
creep behaviour of a Ni–15Cr solid solution alloy at low stresses and intermediate temperatures 11
β-spodumene glass
influence of grain boundary β-spodumene glass on the superplastic flow in tetragonal zirconia polycrystal (TZP) 249
Sputter deposition
evolution of a metastable FCC solid solution during sputter deposition of Ti–Al–B alloys 188
Stainless steel
characterization of a commercial superplastic stainless steel, SuperDux64 43
the effect of nitrogen alloying on the densification process of a sialon ceramic–matrix composite containing stainless steel 218
Stress
use of photoelasticity to study the effect of particle distribution on stress in composites 57

Stress–strain
cyclic stress–strain characteristics of Ti–Ni and Ti–Ni–Cu shape memory alloys 148
Superalloys
the effect of creep and oxidation on high-temperature fatigue crack propagation in ⟨001⟩-loaded CMSX-2 superalloy single crystals 76
Superplastic properties
characterization of a commercial superplastic stainless steel, SuperDux64 43
Superplastic flow
influence of grain boundary β-spodumene glass on the superplastic flow in tetragonal zirconia polycrystal (TZP) 249
Surface deformation
surface deformation and electrical properties of HfN thin films deposited by reactive sputtering 226

Tape casting
review: aqueous tape casting of ceramic powders 206
Tetragonal zirconia polycrystal
influence of grain boundary β-spodumene glass on the superplastic flow in tetragonal zirconia polycrystal (TZP) 249
Texture
texture development in platy materials: comparison of Bi2223 aggregates with phyllosilicate fabrics 157
Thermal effects
investigation of thermal and hydrogen effects on emissivity of refractory metals and carbides 134
Ti–Al–B alloys
evolution of a metastable FCC solid solution during sputter deposition of Ti–Al–B alloys 188
Ti–22Al–23Nb
microstructural evolution during rolling of Ti–22Al–23Nb sheet 26
TiC particulates
Al–TiC particulate composite produced by a liquid state in situ process 172
Ti–Ni
cyclic stress–strain characteristics of Ti–Ni and Ti–Ni–Cu shape memory alloys 148
Ti–Ni–Cu
cyclic stress–strain characteristics of Ti–Ni and Ti–Ni–Cu shape memory alloys 148
Titanium carbide
chemical vapour deposition of titanium carbide on WC–Co cemented carbides 238
Two phase materials
modelling of elastic interaction stresses in two-phase materials by FEM 103

Yield criteria
ultimate criteria for materials with different properties in biaxial tension and compression: a micromechanical approach 84
Yield stress
quantitative measurements of Young's modulus using the miniaturized disk-bend test 18
Young's modulus
quantitative measurements of Young's modulus using the miniaturized disk-bend test 18
